

## **APPENDIX D: Upendo Table Bank Report For Pigs**

Upendo is a community group, supporting 50 orphans&/or vulnerable children [OVCs], and living near Funyula. This is a dry part of Busia where rainfall is unreliable and soil degradation widespread. Several of the women in Upendo are widows with limited time or have limited energy to transform what is subsistence farming in a difficult environment. Hence this is one of the poorest groups which SGG supports. However, Upendo women are led by Macbeth Odero who is probably the best local coordinator within our network. As several of Upendo's members find profitable cultivation difficult, the group have a history of using table-banking funds to rear livestock. Their projects usually involve poultry rearing, but on this occasion they wished to try pigs.

Upendo group received Ksh 20,000/- [about £150] in October 2017 for the purchase of 20 piglets. This allowed each member to have one piglet. The outcomes recorded 12 months later are as follows. What this data illustrates is that pigs can be a very profitable enterprise, and also the guardians concern to find school fees for children in their care.
